1. The amendment filed July 21, 2004 rendered the restriction requirement mailed June 21, 2004 moot and has been entered and is considered to be a satisfactory response to the election requirement made therein.

2. Claim 12 is objected to because of the following informalities: in line 2 - - - hysteresis - - - is misspelled. Appropriate correction is required.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 8 and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Guerra-Vela et al.

Note abstract, Figs. 3-5 and paragraphs 9-15, 57 and 62. Paragraph 62 in particular discloses monitoring of the crystal vibrating the base, i.e. the motion of the base. The forces being monitored could be considered to be drag forces.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references disclose calibrating and/or determining properties of cantilevers or displacement monitoring elements.

6. Claims 9-14, 16 and 18-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
